Adaptiv Technologies Showcases AdaptivMount

Indianapolis, IN - February 12, 2010 - Adaptiv Technologies showcased their new AdaptivMountTM Motorcycle Accessory Mount line at the Dealernews International Powersports Expo in Indianapolis.

Designed to mount electronic and other accessories to motorcycles, AdaptivMounts feature AdaptivSorbTM Anti-Vibration Technology, which significantly reduces the amount of vibration transferred from the motorcycle to the device.

"The AdaptivMountTM line came about as a direct request from our customers," said company CTO Adam Gold. "When we first introduced the TPXTM Radar Detection System we made some mounts to complement it. Our customers were impressed by the quality and the design of our mounts and started asking us to make mounts for other devices. We took it one step further and added a vibration dampening system to the mounts. Through careful design and material selection, we are able to reduce vibration transferred to the device by over 50% compared to other products in the market."

The AdaptivMountTM Motorcycle Accessory Mounts are scheduled to be available by early Spring of this year.

Adaptiv Technologies is the designer and manufacturer of aftermarket motorcycle products. For more information, go to www.AdaptivTech.com or call 866-232-7848.
